

## Classification Scheme of Agricultural Holdings

Classification of agricultural holdings is based on their type of farming and economic size. These are based on the Standard Output (SO) of the various types of agricultural production, which is the average monetary value of the agricultural output at farm-gate price. The typology is arranged in a way that homogeneous groups of holdings can be assembled in a greater or lesser degree of aggregation. The "type of farming of a holding" is the production system of a holding which is characterised by the relative contribution of different production streams to the holding's total SO.
