

**International Statistical Classification of Diseases and Related Health Problems  
10th Revision (ICD-10) Version for 2010**

A classification of diseases may be defined as a system of categories to which morbid entities are assigned according to established criteria. There are many possible axes of classification and the one selected will depend upon the use to be made of the statistics to be compiled. A statistical classification of diseases must encompass the entire range of morbid conditions within a manageable number of categories.
