

TYPE OF INJURY AT WORK

This classification classifies the 'physical consequences for the victim' e.g. bone fracture, wounds, etc of an accident at the place of work. In case of multiple injuries suffered in one accident where one of the injuries is obviously more severe than the others, then this accident should be classified in the group corresponding to the nature of the more obviously severe injury. Only in cases where the victim has contracted two or more types of injuries and one of them cannot be said to be more serious than the other(s) the code 120 'multiple injuries' should be used.
